DETAILED ACTION

Election/Restrictions

This application contains claims 41, 42, 46-49, 56-67 and 73-76 drawn to an invention nonelected with traverse in Paper No. 13. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Response to Amendment

In response to Applicant's amendments, all rejections of record have been withdrawn, however, as a result of these amendments, new rejections are set forth herein.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 43 is rejected under 35 U.S.C. 102(b) as being anticipated by Ponath et al.

As amended, claim 43 is directed to an antisense oligonucleotide comprising SEQ ID NO:18. The claim language is open, encompassing oligonucleotides of any length, and does not specify any particular activity and, therefore, encompasses any nucleotide comprising SEQ ID NO:18, including the antisense strand of a full length cDNA. Ponath et al. disclose an oligonucleotide comprising SEQ ID NO:18 (see for example, the figure legend of Figure 1 and the attached copy of Genbank accession number U49727) and, therefore, anticipates claim 43.

Claim 43 is rejected under 35 U.S.C. 102(b) as being anticipated by Hayashida et al. As amended, claim 43 is directed to an antisense oligonucleotide comprising SEQ ID NO:9. The claim language is open, encompassing oligonucleotides of any length, and does not specify any particular activity and, therefore, encompasses any nucleotide comprising SEQ ID NO:9, including the antisense strand of a full length cDNA. Hayashida et al. disclose a nucleotide sequence comprising SEQ ID NO:9 (see for example, the footnote on page 9655 and the attached Genbank Accession number M38275) and, therefore, anticipates claim 43.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
